

energy efficiency pays

Home energy improvements just got more affordable. Now you can save money and energy thanks to the In-Home Energy Evaluation Program from your local power distributor and TVA.

In-Home Energy Evaluation Program

Here's how it works: a TVA-certified home evaluator will outline potential energy-efficiency measures and the financial options available to you.

Depending on the improvements you make, you can earn a cash incentive for half the cost of qualified modifications, up to \$500 maximum. Or you may take advantage of a convenient financing plan, subject to credit approval.

For more information, call 1-866-441-1430. Or you may fill out the form and return it with your bill payment. Indicate your e-mail address or phone number, depending on how you wish to be contacted.
